

PRODUCT SPECIFICATION

ABUS 24IB Series Diskus Padlock

The 24 series Diskus padlock is a fully marine grade padlock made entirely from stainless steel and other anti-corrosive parts.

An additional feature which makes this a superior option to many other disc padlocks is the reinforced plate within the body, preventing the lock body from being cut or force attacked.

Although disc padlocks are a great security option for any situation we recommend that this product is used with our hasp and staple for maximum security. This covers the shackle completely and makes bolt cutter and saw attacks much more difficult. Remember that all disc padlocks are designed to be 'key-retaining' for security reasons and therefore will only release the key once the padlock is re-locked again.

Lock Types & Details:

24IB Series Diskus Padlocks					
ABUS Reference Number	 mm	 mm	ABUS GPS	Weight kg	Box qty
24IB/60	60 / 60 / 26	17.5 / 13 / 8	7	0.220	6
