

## PRODUCT SPECIFICATION

### ABUS Aluminium Padlock

Padlock manufacturers have been looking for an alternative to brass for a long time. This brand new padlock is constructed from extruded, cut and drilled aluminium and does not degrade. The hardened steel shackle is Nano Plated, a new development which allows steel shackles to be highly weatherproof without rusting. A ball bearing lock mechanism, often found in the more expensive high security locks, gives this model a much high resistance to force attacks.

On large orders the lock can be made to be key retaining and master-key suites are available. They are especially suited to safety lock-off applications. They are available in 6 colours with a short or long shackle.

### Lock Types & Details:

72 Series Aluminium Padlocks					
ABUS Reference Number	mm	mm	ABUS GPS	Weight kg	Box qty
72/40 KA TT00260	38 / 73 / 17	20.5 / 24.5 / 7	6	0.134	6
72/40HB40 KA TT00260	38 / 86 / 17	20.5 / 40 / 7	6	0.139	6

### Padlock Features:

- Pin Tumbler Mechanism
- Ball Bearing Locking
- Saw Resistant
- 7 colours available:  
(Black, Blue, Green, Orange, Red, Violet, Yellow)
