

## PRODUCT SPECIFICATION

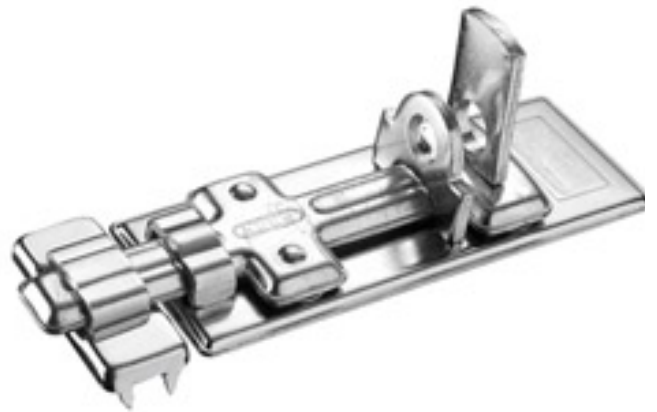

### ABUS Locking Bolt

The locking bolt has the advantage over traditional hasp and staples of being able to keep a door shut whilst unlocked. However, since there are more moving parts exposed we would advise using a hasp and staple for higher security situations.

The bolt itself is made from hardened steel to resist saw attacks and the fixing screws are concealed from the front. A nickel finish also gives the whole unit excellent corrosion resistance.

#### Sizes:

This model is suitable for any padlock with a maximum shackle thickness of 9.5 on the smallest size and 13mm on the largest. Please ensure that the padlock you choose to use does not exceed this measurement.

### Bolt Sizes & Details:

300 Locking Bolts					
ABUS Reference Number	 mm	 mm	ABUS GPS	Weight kg	Box qty
300/100 C	100 / 39	9.5	6	0.180	6
300/120 C	120 / 46	10.5	6	0.250	6
300/140 C	140 / 54	13	6	0.370	3

### Features:

- Steel construction: For use with padlocks
- Hardened steel bolt: Resists attack
- Corrosion protected: Durable security
- Hidden screws: Deters opportunist theft
- Made in Germany
