

PRODUCT SPECIFICATION

ABUS Extreme Weatherproof Closed Shackle Padlock

This closed-shackle model of the new ABUS Extreme range is the latest thing in the padlock market. Offering the strength of hardened steel and the resistance of the closed shackle design.

The ABUS Extreme range has evolved from their 83 series which led the way in high security padlocks. These Extreme use the same technology in terms of high security features such as ball bearing locking which prevents level and force torsion attached with crow bars. They also use special anti-pick barrels and hardened alloy steel shackles.

The new Extreme model however incorporates the cathophoretic coat found on the Granit range and the special Nano-protect treatment found on their 41 series. They then finish it off with a key guard to make a highly secure and weatherproof lock. Although ideal as a high security lock both indoors and out, they are especially suited to exposed locations and saline environments. The closed shackles make it especially difficult for bolt cutters to reach and crop the shackle which is inherently the weakest part of the lock.

Lock Types & Details:

83WP Extreme Weatherproof Steel Padlocks					
ABUS Reference Number	mm	mm	ABUS GPS	Weight kg	Box qty
83WPCS/53 C	57 / 98 / 36	18 / 25 / 8		0.420	6

Padlock Features:

- Hardened Steel Shackle & Body
- Rustfree "Marine Grade"
- Bolt Cutter Resistant
- Drill Resistant
- Saw Resistant
- Ball Bearing Locking
- Keyed Alike option available
- Master Key option available
- Made in Germany

Testing & Standards:
