

PRODUCT SPECIFICATION

ABUS Submariner Padlock

The new Submariner series is the best marine grade lock out. It is developed from the new ABUS Extreme range which is already regarded as a weatherproof marine grade lock. They then improved on it further to produce this Submariner series which is currently used to lock up the North Sea wind farms in a saline environment which would destroy a normal padlock in days.

The whole lock uses stainless components and a ball bearing locking mechanism which is much more resilient to the weather than a normal spring loaded locking mechanism. A sealed body, key guard and ultra-tight shim guards on the shackle help prevent excessive exposure to the elements.

The Submariner is developed for use in environments which are subject to salt water. They are ideal for yachts, moorings, ships, containers, off-shore platforms and any other harsh environments where all other effects to prevent rusting have failed.

Lock Types & Details:

83WPIB Submariner Weatherproof Brass Padlocks					
ABUS Reference Number	 mm	 mm	ABUS GPS	Weight kg	Box qty
83WPIB/53 C	57 / 98 / 36	25 / 28 / 8		0.400	3

Padlock Features:

- Pin Tumbler Mechanism
- Hardened Steel Shackle & Body
- Rustfree "Marine Grade"
- Ball Bearing Locking
- Bolt Cutter Resistant
- Drill Resistant
- Saw Resistant
- Keyed Alike option available
- Master Key option available
- Made in Germany

Testing & Standards:
