

PRODUCT SPECIFICATION

ABUS T84 Brass Padlock

This padlock is ideal as an all-round marine grade weatherproof padlock but also as a electrical safety lock-off padlock where sparks caused from a steel shackle could be dangerous. The brass shackle has been tested to be safe when used in the vicinity of petroleum and other flammable liquids and gases.

Ideal situations include all vehicles, trailers, containers and boats which are subject to sea/salt water. They work particularly well where the padlock is left locked outdoors for long periods of time.

The precision 5 pin tumbler with self-locking mechanism make the padlock highly secure against picking, while the hardened steel shackle and double bolted case help protect the lock from force attacks. Both the stainless internal mechanism and the external brass body also ensure the lock will function well outdoors.

Lock Types & Details:

T84 Series Brass Padlocks					
ABUS Reference Number	 mm	 mm	ABUS GPS	Weight kg	Box qty
T84MB/20	22.5 / 33 / 12	10 / 10.5 / 3.5	2	0.044	12
