

PRODUCT SPECIFICATION

ABUS 65 Series Brass Padlock

The ABUS brass padlock offers tough, reliable security at competitive prices. The 65 series is extremely good value for money and our best selling product by far. The stainless brass casing and stainless steel mechanism also make it highly resilient to all types of weather. We would, however, recommend the weatherproof range if the lock will come into contact with salt water or prolonged outdoor used.

The precision 5 pin tumbler with self-locking mechanism make the brass padlock highly secure against picking, while the hardened steel shackle and double bolted case help protect the lock from force attacks. Both the stainless internal mechanism and the external brass body also ensure the lock will function well outdoors.

Lock Types & Details:

65 Series Brass Padlocks					
ABUS Reference Number	mm	mm	ABUS GPS	Weight kg	Box qty
65/20	20 / 34 / 10	9.5 / 11.5 / 3.5	3	0.036	12
